RE: Ohio/Eckhardt Report  
TDD F5-8009-3

On the morning of September 17, 1980, an off-site inspection of the Greene Landfill II was conducted for the purpose of assessing the sites priority ranking. The work party was composed of Randy Livingston, Dan Cozza, Cindy Bachunas, Cluade Mays, myself and Mike Moschell of the OEPA-SEDO. A serious leachate probelem was known to exist at the site and the purpose of this off site investigation was in part to confirm the leachate problem. No leachate could be seen due to dense vegetation and the distance to the area in question.

After a telephone conversation with Randy Marshall of OEPA on September 23, 1980, the problem was confirmed but it was agreed upon that the local health authorities would resolve the problem and that E&E should be kept abreast of the site's developments.

Also on September 17, 1980, an on-site investigation was conducted at the American Cyanamid plant in Marietta, Ohio. The work party consisted of the same members with Dan Cozza and myself as the site entry team. The Preliminary Assessment Form, Site Inspection Form, Supplemental Surface Impondment Form, Storage Facility Form and recommendation is included with the memo for that site.
